

ANTENYI JOSEPH OCHOHEPO

Software Developer | Go & Python | Backend & Web Development

Nigeria | antenyijoseph20@gmail.com | 07012572796

PROFESSIONAL SUMMARY

Software Developer focused on building practical applications that solve real-world problems. Hands-on experience through projects using Go, Python, JavaScript, HTML, CSS, REST APIs, Git, GitHub, databases, and SQL. Comfortable with backend logic, web applications, authentication, data handling, debugging, and layered application architecture. Continuously developing technical skills through practical projects.

TECHNICAL SKILLS

Languages: Go (Golang), Python, JavaScript **Web:** HTML, CSS, HTTP, REST APIs

Backend: Go web development, authentication, business logic, layered architecture

Data: SQL, JSON, data persistence **Tools:** Git, GitHub, Linux/Terminal, Visual Studio Code

Practices: Debugging, testing, modular design, problem-solving

SELECTED PROJECTS

Nigeria Online Voting System — Go (*In Development*)

- Developing a civic technology application exploring voter authentication, election integrity, transparent processes, and reliable data management.
- Implemented user registration, login, password handling, and candidate/party functionality.
- Designed layered architecture using handlers, services, repositories, and models.
- Implemented persistent user data storage using JSON and separated business logic from data-access logic.

ASCII Art Web — Go (*Completed*)

- Built a Go web application that converts user-entered text into graphical ASCII-art representations.
- Implemented multiple banner styles, HTTP handlers, templates, input validation, and error handling.
- Debugged formatting, spacing, and newline issues and used Git/GitHub throughout development.

CLI Calculator — Go (*Completed*)

Command-line project demonstrating programming fundamentals, input handling, arithmetic operations, and structured logic.

Payroll Calculator — Programming Project (*Completed*)

Practical application for payroll-related calculations using variables, arithmetic operations, and structured data processing.

PROFESSIONAL EXPERIENCE

Foreman — Chinese Harbour Engineering Company | Benue State, Nigeria | 2024–2025

- Coordinated daily field activities during earth-moving and road construction operations.
- Instructed and coordinated equipment operators according to work requirements.
- Communicated work instructions clearly and helped organize daily site operations.
- Developed practical skills in coordination, problem-solving, communication, and responsibility.

EDUCATION

Higher National Diploma (HND), Business Administration

Benue State Polytechnic, Ugbokolo, Benue State, Nigeria

National Youth Service Corps (NYSC) — Completed 2019

TRAINING & DEVELOPMENT

Google Essentials | Coursera technical learning | Learn2Earn software development training
